

Fully Funded PhD Assistantships Available in Robotics

The West Virginia University Navigation Lab (<https://navigationlab.wvu.edu/>) is seeking PhD students. Candidates should hold an undergraduate degree or master's degree in an engineering discipline relevant to robotics. Candidates should preferably have demonstrated experience working with both the hardware and software integration of robotic systems. Candidates should also have demonstrated success both at working individually and in a collaborative team environment.

Current research topics available include planetary rover navigation and the navigation of both drones and robots operating in complex subterranean environments.

Interested candidates should apply for admission to WVU's Mechanical and Aerospace Engineering graduate program. Please contact Dr. Jason Gross once you have completed an application.
